

Software

To ensure that our clients discover the full potential of their IT investment, Perpetual Technologies, Inc. provides software services including software licensing sales, vendor management, software support, installations, upgrades, and patches.

Approved Software Reseller

Perpetual Technologies (PTI) is a licensed reseller for both Microsoft and Oracle products. Our trained and certified licensing specialists work with your PTI Technical Consultant and your internal IT team to provide competitive quotes for all Microsoft and Oracle products. We ensure that you receive **authentic software** at the best prices possible. Our licensing specialists can also coordinate **volume discounts** and enterprise licensing agreements for customers with larger software purchases.

Vendor Management

In addition to licensing sales, our consultants can provide vendor management services which include direct coordination with software vendors – whether Microsoft, Oracle, or any third party vendor. Many businesses rely on a third party vendor's representative to provide support and crucial information during application implementations as a result of company mergers or software adoptions. As knowledgeable as the vendor's representative is, their ultimate responsibility is to sell their product. PTI's experienced staff **represents your needs** to ensure the most appropriate and cost-effective implementation for your business. From initial vendor/product selection to complete installation, Perpetual Technologies' team continues our **partnership commitment** to our clients.

Software Support

With the rapid evolution of information technology, patches and upgrades are inevitable. Perpetual Technologies' technical consultants manage those changes by assessing the relevance to your business needs, planning necessary upgrades and patches, and providing tested and proven solutions when upgrades or patches are not yet openly available.

Custom application development is also available for applications utilizing **C, C+, C#, Java, .Net, PL/SQL, Oracle Forms and Reports.**

For more information about our Software Services, please contact a Perpetual Technologies Business Development Consultant at (317) 824-0393.

The right partner can help ensure that your technology investment addresses your unique business needs and helps you reach specific goals.
